

REJECT ALL BIDS; PRICE TOO STEEP

Thirty Contractors Said to Have Submitted Proposals in Vain.

Tucumcari, N. M., Oct. 29.—All the bids on the proposed Vorenberg hotel have been rejected as too excessive, and new bids have been called for. It is said that over 20 bids were made by the various contractors. The building proposed is to be of the mission style and to cost in the neighborhood of \$20,000.

Tucumcari has another cold wave, with snow threatening. Old settlers claim that the season beginning thus means a hard winter with good crops next year.

Practically all of the tickets were sold to the Elks' minstrel and vaudeville show, the weather keeping some of the audience away. The program consisted of a minstrel first part, with a second part of feature acts. The show was given to raise funds with which to build the new club house for the lodge.

BISBEE INVADDED BY GRASSHOPPERS

Bisbee, Ariz., Oct. 29.—A swarm of grasshoppers has made its appearance here, myriads of them dropping dead in the streets and on the hillsides. An enormous crowd attended the Buffalo Bill show near Don Luis. Twenty-two hundred railroad tickets were sold, while the road to Don Luis was alive with automobiles and vehicles of every description.

The case of Hull vs. Finnerly, concerning several lots of ground located near Don Luis, was heard by United States Commissioner Taylor. A number of witnesses were examined, and the case was postponed to November 1 in order to gather further evidence.

The damage suit of Mrs. J. B. Brazier vs. the city of Bisbee will be heard in the supreme court of Arizona on November 14. This case has been dragged through courts for years and should Mrs. Brazier win, the city of Bisbee must pay her a sum of \$5000.

Rev. E. D. Riley has established three Sunday schools in the Sulphur Springs valley and one in Wilcox. He will continue his missionary work of opening Sunday schools in other districts.

Rev. John Fry was elected to represent Bisbee at the Presbyterian meeting in Phoenix, at which plans will be made to organize an industrial school for Indian children in Pima county.

A mothers' meeting, to be held at the Warren Kindergarten, has been called by Miss Georgia Lomas.

COLONIA DUBLIN PEOPLE ARE COMING TO THE FAIR

Colonia Dublin, Oct. 29.—A number of Dublin people are preparing to attend the fair at El Paso. Charles Whipple will have some fruit there, but the difficulty in passing the line has somewhat discouraged others.

A crowd of tourists have gone to Colonia Hernandez and are enjoying the wild scenery, visiting the old Indian ruins, the caves, etc. The railroad proposes to build a summer resort up in the pines.

The Mexicans are leaving the little colonia of Hernandez because they are being tilled.

There have been no diptheria deaths but two new cases have developed.

"Perhaps the most interesting party of the season was held at Colonia Juarez under the direction of the Parents' class in Sunday school. All of the married people in town were invited and a number of them were in attendance.

James Cluff of Colonia Pacheco, who died of Bright's disease, leaves a wife and a large family.

YOUNG WOMEN OF MARFA ORGANIZE A CARD CLUB

Marfa, Texas, Oct. 29.—The society young women met with Miss Jessie Woodward and organized a card club. The charter members are: Misses Alice Brown, Gladys Bogel, Lila Bruton, Jessie Woodward, Johnnie Carrico, D. Ella Kline, Willie Ellison, Alice Lovelace, Nina Heard, Lela Malone, Willie May Mellard, Brent Nicolls, Lorena Shannon, Mary Shannon, Felty Rita Brown. Their first card party will be next week at the residence of Mrs. J. K. Brown.

Mrs. George Carson entertained at cards Thursday afternoon at the home of another mother, blowing here, with plenty of dust thrown in.

The Jno. Shields residence is nearing completion.

William Murphy has purchased the corner property now occupied by Mrs. Patty and family.

The Marfa History club was entertained by Mrs. W. A. Harris at the last meeting.

VELTON CASE GIVEN TO JURY AT SOLOMONVILLE

Solomonville, Ariz., Oct. 29.—The jury in the Velton case is still out. Witnesses have returned to their homes and James S. Elder, counsel for the defense, has returned to Deming, New Mexico.

Wiley Hardin, charged with taking public records, pleaded guilty, stating that he was under the influence of liquor at the time. He was sentenced to six months in jail, but sentence was suspended during good behavior, as there was apparently no motive for the crime.

Civil business has been taken up by the court.

SHOWS DOUBTING WOMEN THAT SHE DOESN'T PAD

Kansas City, Mo., Oct. 29.—With the statement that she had been accused of padding, Miss Annette Kellerman, posing as the woman beautiful, cut a long slit in the leg of her tight to prove to 1000 women in the Orpheum theater that the statement was false. There was not a man in the house. Even the ushers were girls.

Atlanta, Ga., Oct. 29.—Driving a tack into the skull of Robert Ward, a negro, to cure blindness, caused the arrest of William Williams, another negro, on a charge of swindling, he having charged \$2.50 for the alleged operation. Ward told the police judge that the tack process was not very painful, but he was sore about the way Williams got the \$2.50.

Osteopathy Wins Its Greatest Victory

Investigation Of the Patients of the Dr. A. T. Still Osteopathic Infirmary,
Under Dr. Ira W. Collins, by a Notary Public, Meets With the
Following Results in Favor of Dr. Ira W. Collins.

This certifies that I, G. L. Hannan, am a notary public in and for El Paso County, State of Texas, and that I took the statements of the leading people of El Paso who had been treated at the Dr. A. T. Still Osteopathic Infirmary under Dr. Ira W. Collins, for nearly every disease you can think of, and they verified the fact that they were cured, and were enthusiastic in praise of the Osteopathic treatment.

G. L. Hannan.
Subscribed and sworn to before me, this 26th day of October, A. D. 1910.
A. S. Thurmond,
Notary Public in and for El Paso County.

I took the statements of asthmatics who had been given up by physicians, and they are now well.

BLINDNESS.
I took the statement of a lady who had been afflicted with blindness, and others who had been treated for other eye troubles, and who can now see to read and are perfectly well.

FEMALE DISEASES.
I took the statements of ladies who had suffered with female diseases; they are now strong and well, and some of them had continued so for years, since taking treatment. They were all enthusiastic in its praise. No operations given in any instance. Tumors had been shed by several.

DEAFNESS.
I took the statements of the deaf, who can now hear as well as any one else.

PARALYSIS.
I took the statements of paralytics who can now use their limbs perfectly.

CATARH.
I took the statements of catarrhal patients, who had shed the adenoids, and some who had had large mastoid abscesses, and all were cured.

FITS.
I took the statements of those who had had fits, and they are now perfectly well and were loud in praises of the treatment.

CONSUMPTION.
I took the statements of consumptives and others formerly afflicted with throat troubles, and they are now perfectly well and had been for years.

LUNG FEVER.
Several people who had been cured of lung fever by Dr. Collins' treatment made the statement to me that after being given up to die they had been perfectly cured by this treatment.

GALL STONES AND LIVER TROUBLES.
I took statements of patients who had been cured of liver trouble and gall stones by Dr. Collins' treatment, after being considered past relief by physicians.

STOMACH TROUBLES; INDIGESTION.
I took the statement of those who had been suffering with liver, cramps and stomach troubles and indigestion, who say that they are now able to eat their kind of food and enjoy life.

BRIGHT'S DISEASE.
I took statements of people who had Bright's Disease in their families, who had been given up by physicians, and after treatment by Dr. Collins, were wonderfully cured.

RHEUMATISM.
I took the statements of those who had suffered with several different kinds of rheumatism, and they claim that they are now perfectly well and have never had it since—in one instance the patient had been treated eight years ago without having had a return of the disease.

SPINAL MENINGITIS.
I took the statement of those who were suffering with spinal meningitis, and they were loud in their praises of the treatment.

CHILDREN'S DISEASES.
I took the statement of mothers whose children were cured of all kinds of children's diseases, and they were enthusiastic in their praise of the Osteopathic treatment.

I took the statement of mothers whose children had suffered with spasms and who could not lift their little heads from their pillows, that are now strong and well.

TUBERCULAR AND SHRIVELED LIMBS.
I took the statement of mothers whose children had been cripples for years with tubercular and shriveled limbs, who have recovered so completely that they say that no one could tell which limb it was. One young lady assured me that she had been a cripple for nine years, and would still be so,

but for Dr. Collins' treatment.

TYPHOID FEVER.
I took the statements of those who had gone through typhoid fever, and all were loud in their praise of the treatment of Dr. Collins which had cured them.

SCARLET FEVER.
I took the statement of mothers who had children cured of this dreaded disease by the Osteopathic treatment, and they were enthusiastic in its praise.

BLOOD POISONING AND OLD SORES.
I took the statement of those who had had blood poisoning ranging from nail in foot to old sores of several years' standing, and it was remarkable how well they recovered after trying all other kinds of remedies.

NEURALGIA AND HEADACHES.
I took the statements of those who had suffered with neuralgia in its worst form for years, and all kinds of headache, and they in each instance claimed to be cured.

APPENDICITIS AND ABSCESSES.
I took the statements of those who had been cured of appendicitis, and they were each cured. No operation in any instance. Some had abscesses which opened up and drained and healed nicely.

Think of those you have known who have been foolish enough to let a surgeon scare them into an operation. They are nearly all dead now. Why should you resort to surgery, which cannot cure as great a percent of diseases as Osteopathy can, and no danger from Osteopathy?

HOW OSTEOPATHY CURED SIX THOUSAND CASES WITH ONLY LOSS OF SIX PATIENTS—EVERY KIND OF DISEASE.

E. H. Harriman, the Railroad Millionaire's Family Could Have Had Him Cured for One Hundred Dollars When They First Thought of Osteopathic Treatment. Then They Were Heart Broken When the Great German Doctors of Austria Told Them the Trouble Came from the Spine and It Was Too Late. You Could Have Had Yourself or Family Cured for a Small Sum, But It Will Cost a Thousand to Bury You or Them This Winter.

Give good health to yourself and loved ones for the best present in the world, cheaper than to be buried this winter, with that trouble that is coming on you. Some dangerous disease may be just beginning to take hold on you. May be it is showing itself in a cold or that same old trouble which will end your days this time.

A Hundred Dollars applied on you now may mean years of happiness.

You don't value your health as you ought to, and don't guard your loved ones as you should. Your loved ones will have to spend a thousand dollars to bury you this winter, or you will help to bury some of them.

Just think how easily E. H. Harriman could have saved his life by going to an Osteopath and had this place in his back loosened so the blood could have circulated in the walls of his stomach.

Six thousand died in El Paso because of a place like this in their spine. Six thousand were cured by removing this place in their spine. Only lost six in five years who came too late. Don't be foolish.

Here is a place in the spine that caused E. H. Harriman's death.

Thousands of them have been removed at Dr. A. T. Still's Osteopathic Infirmary, at different places according to what disease they were causing.

Vienna, Oct. 1st.

According to Professor A. Van Strassell, Harriman's European Physician, the Railroad Magnate was suffering from spinal disease known as "Abruse rheumatism" at the time of his death, and the cancer was secondary.

The diagnosis was confirmed by an X-Ray Examination. Later the stomach trouble developed into cancer by irritating it with Mineral Waters and Drugs.

These great German Doctors were right; this place in his spine caused the blood to stop circulating, and this stagnant blood had to escape into his stomach in sores, and Mineral Waters and Drugs eat down the cells, and irritated it into a cancer. Every disease

is caused by one of these places in your spine. Feel your own spine.

The stagnant blood may escape in shape of cold, and may run into pneumonia, but that congestion is in the spine, and an Osteopath is the only way to permanently cure you. Don't let your prejudice kill you—just try it.

Four thousand less medical students in college than in 1907. (Journal American Medical Association.)

Osteopathic Schools never were so crowded. (Osteopathic Journal.)

TELLS ITS OWN STORY.

Washington, D. C., Associated Press.

At a meeting of Associated Public Hospitals Managing Physicians today, Dr. Ross, Superintendent Hospital, Buffalo, New York, said:

"There was given in our Hospital in America three hundred percent less drugs than ever before in their history, and many new Hospitals now have no drugs given in them."

Think of that, you who are prejudiced against Osteopathy.

In ten years a Doctor who gives drugs will excite as much curiosity as a cannibal would turned loose in your streets. People will point to him and say: "There goes a man who thought he could cure a sick man by poisoning him."

He gave him calomel and eat his liver into ulcers. Of course the man is dead now. Six thousand of them died in five years here in El Paso, while only six out of six thousand at the Dr. A. T. Still Osteopathic Infirmary. Pneumonia is, so easy to cure by Osteopathy.

A doctor in Chicago has been producing in dogs almost any disease desired, by exerting a pressure on the spine, drawing it in different directions, and holding it there until it becomes fixed, then the deadened nerve produces the disease by stopping the circulation to any one organ.

We cure all diseases by removing these pressures from the nerves and blood vessels, and allowing Nature to build up new cell life, and perfect health is the result.

Below, I give out of 6000 cases some of the principal dislocations I find in the spine and some of the common diseases which have been cured here. Out of this number we have lost but six cases. One of them was a consumptive so far gone we had no hope; one with lymphatic leukemia; and one had typhoid fever and spinal meningitis which had so far exhausted the little fellow that when we did restore the circulation, he did not have enough strength to rally. But we think it an excellent record, notwithstanding the loss of these six, when we consider that 75 percent of our patients are given up by others when we get a chance at them.

NEURALGIA.

Case 1. A prominent lady of the city had suffered nearly all her life with neuralgia. We found the first cervical vertebra in neck drawn to one side, deadening the nerves and stopping the circulation of the blood to the head. This was straightened and the case cured.

A great many of these cases have come to us, and have all been cured. The dislocations were not all alike, however, and the neuralgia was in different parts of the body.

LIVER AND STOMACH TROUBLES.

Case 2. A superintendent of a railroad was said to have consumption, but we straightened spine at second vertebra of neck and of fourth rib, freeing the nerves leading to stomach and liver, and cured the case, so that he can now eat anything. We have had a large number of these cases; all cured when treatment was taken long enough.

DEAFNESS AND CATARRH.

Case 3. A young lady was deaf and suffered with catarrh for many years. We straightened the third vertebra of the neck, freed the circulation to the ears and head, and cured the case.

We have a great number of these cases. In many of them it takes some time before much improvement is noticed, then they gradually get better until entirely cured. Dislocations affecting nerves leading to stomach often causes these troubles, and when we restore stomach circulation the troubles leave them.

WHOOPIING COUGH, HICCUGHS, ETC.

Case 4. Bad case in boy that had run into death hiccoughs, but was entirely cured by straightening the fourth vertebra in neck and freeing nerve to diaphragm. We have had a great many of these cases. All cured.

INSANITY.

Case 6. Young man who had had an attack of la grippe, which had drawn the sixth vertebra in neck so that it interfered with circulation of blood to the head, and he became violently insane. This was straightened and the case cured.

We find these dislocations in different parts, causing congestion that gives rise to different kinds of insanity. In some cases we find it takes several months' treatment, while in the case mentioned above ten days was sufficient to restore circulation. Constant thinking on any one subject will draw much blood to one part of the brain as to cause insanity on that particular subject. If the patient can be kept from dwelling on that subject and the excitement is no longer there the vertebra will restore itself and circulation will become normal in the brain, and the patient becomes rational again. As in the case of Harry Thaw, who, when White—the cause of a rush of excess blood to a part of his brain—no longer existed, he became rational again. Nearly all cases of insanity are curable by Osteopathy.

PARALYSIS.

Case 7. Middle aged man had one side entirely paralyzed and heart circulation had almost ceased at times. His spine was straightened at 7th vertebra in neck, which was cutting off circulation from the thyroid gland. This was straightened and case entirely cured.

Cases of eye diseases of various kinds are brought to us. All have been cured or helped when treatment was taken long enough. We find that pressure on the nerves leading to different parts of the eye causes the different diseases; so the dislocation is not always at the same place in spine.

DYSPEPSIA AND INDIGESTION.

Case 11. A prominent business man suffered for many years. Straightened spine at fourth rib, restored the nerves leading to stomach, and the blood again in stomach walls, and he can now eat any kind of food without trouble. A large percentage of our cases are of this nature. All are cured or benefited.

HEART DISEASES.

Case 12. A prominent business man was compelled to sell out his business on account of irregularity in heart beat. Found 5th rib pressing on the heart. Removed the pressure from heart, restored it to normal, and cured the case. This man went back into active business.

We have a great many cases of weak heart, but usually find the dislocation at the vertebrae of second and third ribs, these nerves leading to the heart, and usually we are compelled to remove some other lesion where there is a congestion, to lighten the work of the heart. Nearly all these cases are cured; all benefited.

MALARIA, BILIOUSNESS AND ENLARGEMENT OF LIVER.

Case 13. A prominent contractor who had been living in a malarial district in the south contracted the fever, which left him with enlargement of liver and cramps. This case was entirely cured by straightening spine at 7th and 8th ribs, thus loosening the nerves to the liver, forcing new circulation.

CONSUMPTION AND BRONCHIAL TROUBLE.

Case 9. Consumption in a young lady. The vertebra of second rib was dislocated backwards; the large bones of each hip were also backwards, drawing the lower part of the spine backwards, and this having muscles that are attached by diagonal muscles to the front end of the lower ribs, draw them down in front and choke off lung space, in addition to deadening the nerves to intestines, and choking the kidney circulation. This throws too much stagnant blood—which has become acid—to lungs, which are pressed upon by these downward ribs, eating cavities into them. A general treatment to straighten these hips forward and straighten spine was given and case cured.

We have had a large percent of these cases, and all were either cured or much benefited, except one case, which we lost. Almost all consumption is caused by overeating, congesting the spine in small of back, where nerves lead to bowels, causing them to allow weight of body to throw hips back and draw spine with them. And if these patients drink too foul water, typhoid fever is the first indication of disease. High fed stock will contract consumption by being overfed, but you never heard of a Texas range steer having it, or in poorly fed families, except where the food was poorly prepared, thereby exhausting the nerves to digest it or by eating food that is often decayed. Any exhaustion of system which causes ribs to fall down in front and hips to fall backwards causes consumption. It is not contagious as conductors in overcrowded trains associate with these cases daily, and yet are no more liable to contract this disease than men engaged in other callings.

Bronchitis is caused by rigid hip being drawn backwards, affecting the circulation of blood to liver and kidneys, causing too much stagnant acid-blood to go to lungs, to be there oxidized, which irritates the bronchial tubes and throat. Left hip being dislocated backwards, affects circulation of kidneys and spleen, causing Bright's disease by distributing lymphatic circulation, and if filthy water is used or poorly cooked food eaten typhoid fever results. Possibly a hundred cases of throat and all kinds of lung trouble have been cured.

DISEASES OF EYES.

Case 10. Boy blind most of time for five years; tumor on one side of eye-balls. The vertebra of the second and third ribs drawn to one side, contracting the nerves leading to eyes. He suffered intensely. The spine was straightened and case entirely cured.

Cases of eye diseases of various kinds are brought to us. All have been cured or helped when treatment was taken long enough. We find that pressure on the nerves leading to different parts of the eye causes the different diseases; so the dislocation is not always at the same place in spine.

APPENDICITIS.

Case 16. A general manager of the Standard Oil Co. was cured here by removing the dislocation of first and second lumbar and straightening right hip, thus loosening iliohypogastric and the inguinal nerves which, together with their nerves, supply these parts with circulation of blood. We have had about one hundred cases of appendicitis, many of them so bad that operation was demanded, but all were cured by removing these conditions of spine and hip without any operation. Being a graduate in surgery myself and having met with about one thousand cases here and in other places, I have never seen a case requiring operation, as the healing will take place by removing the trouble at spine and hip, so that the appendix and bowels have a good blood supply. Also by cutting out solid foods for a time. The result is invariably a cure.

CONTINUATION AND FEMALE TROUBLE.

Case 15. Mrs. Senator Foraker, who was at Kirksville and saw, probably, 1000 cases of misplacements and other female troubles cured, said: "If Dr. Still had discovered no thing more than his way of curing these diseases without surgical operations, he has done more to bless suffering women than anyone who has ever lived."

We usually find misplaced large hip bones, together with fourth and fifth lumbar vertebra twisted, also eleventh and twelfth dorsal, allowing prolapsus and misplacements. These are always cured or helped, even when adhesions have formed. Tumors are easily reduced and growth stopped. This kind constitutes the largest percentage of our cures.

In biliousness the liver is usually overworked by eating more food than needed, and then when it can supply no more, it is lashed into activity by physic, until the trouble ends in chronic constipation. These cases are all cured by eating less and freeing nerves to liver and bowels. We have more of these cases than any other kind. It takes considerable time when case is chronic, but can always be cured if time enough is taken. If physics are continued or stimulants it ends in stroke or paralysis.

BRIGHT'S DISEASE AND KIDNEY TROUBLE AND TUBERCULAR HIP IN CHILDREN.

Case 15. A prominent man was cured who was so bad that his lower limbs were all swollen and broken out in many sores; turned out of hospital as incurable, to die. Spine was straightened at 11th and 12th ribs and left the hip loosened, and the case was cured.

We have many of these cases, and find the dislocations all about the same. Most of them are among leading lawyers and professional business men, who use more blood in the brain than in their muscles. Too much albumen is eaten to keep up brain blood, too, and as the muscles do not use it up, the kidneys are overtaxed and they become congested at the 11th and 12th ribs. All these cases are cured or benefited. Sometimes ladies who are high livers and do little work bring on this disease by consuming more albuminous foods than are used by muscles and thus overtax the kidneys.

Tubercular limbs in children are usually caused this way: Kidneys become overtaxed by carrying off too much waste from too heavy eating. Kidneys become congested and the ureters draw so that they pull hips out of place. Muscles in small of back also congest on account of nerve being overworked digesting too much food, saturated by uric acid, not carried off by kidneys. We have more of these diseases than any other kind of physicians. Nearly all are cured or much benefited. Many do not take treatments long enough.

APPENDICITIS.

Case 16. A general manager of the Standard Oil Co. was cured here by removing the dislocation of first and second lumbar and straightening right hip, thus loosening iliohypogastric and the inguinal nerves which, together with their nerves, supply these parts with circulation of blood. We have had about one hundred cases of appendicitis, many of them so bad that operation was demanded, but all were cured by removing these conditions of spine and hip without any operation. Being a graduate in surgery myself and having met with about one thousand cases here and in other places, I have never seen a case requiring operation, as the healing will take place by removing the trouble at spine and hip, so that the appendix and bowels have a good blood supply. Also by cutting out solid foods for a time. The result is invariably a cure.

CONTINUATION AND FEMALE TROUBLE.

Case 15. Mrs. Senator Foraker, who was at Kirksville and saw, probably, 1000 cases of misplacements and other female troubles cured, said: "If Dr. Still had discovered no thing more than his way of curing these diseases without surgical operations, he has done more to bless suffering women than anyone who has ever lived."

We usually find misplaced large hip bones, together with fourth and fifth lumbar vertebra twisted, also eleventh and twelfth dorsal, allowing prolapsus and misplacements. These are always cured or helped, even when adhesions have formed. Tumors are easily reduced and growth stopped. This kind constitutes the largest percentage of our cures.

Dr. A. T. Still Osteopathic Infirmary

Dr. Ira W. Collins, Physician in Chief.

Cor. Missouri and El Paso Streets, El Paso Texas
